

OTE 81-5709

8 APR 1981

MEMORANDUM FOR: DDA Equal Employment Opportunity Officer

STAT FROM:

Director of Training and Education

SUBJECT: Establishment of the "Advanced Engineering Technologist Program" (AETP)

REFERENCE: Draft memorandum, same subject, dated 19 Mar 1981

1. I have reviewed your draft of the proposed "Advanced Engineering Technologist Program" with interest; a few items should be pointed out. The main concern, however, is not with the waiver of training for staffers and non-staffers, but with the intent of Agency sponsorship to obtain academic degrees. Although the Agency is exempt from select portions of Title 5, U.S. Code, Chapter 41, by Executive Order 10805, the restriction on sponsorship to obtain an academic degree is not one of them. This is one of the restrictions of training at non-Government facilities for which there is no waiver authority.

2. We have checked Lovejoy's College Guide for those colleges and universities offering degrees in engineering technology (this includes all the engineering technologies you stated). Of the ten institutions you mentioned in this field, Lovejoy's does not list under this heading: Tuskegee Institute, Virginia Union University, Hampton Institute, Jackson State University, Texas Southern University, or Fort Valley State College. Savannah State, Temple University, Old Dominion, and Norfolk State University are listed. When checking these in the College Blue Book, Old Dominion University is listed as offering an associate degree in the mechanical engineering field. Savannah State College is listed as granting a bachelor degree in civil engineering technology, Temple University is listed as granting bachelor degrees in mechanical and electrical engineering technology.

3. Lovejoy's Guide also specifies that the facilities listed under engineering technology are accredited by the Engineers' Council for Professional Development as technical institutes. George Washington University's School of Engineering, also accredited by

Subject: Establishment of the "Advanced Engineering Technologist Program" (AETP)

this group, has established standards for transfer credit from institutions of higher learning and from technical institutes. Attached is a copy of the catalog page stating the requirements. The Agency should not interfere with the requirements of any academic institution for earning degrees.

4. Also attached for your information are copies of pages from the College Blue Book listing all schools in the country offering bachelor degrees in these areas.

 ments for waiver of, or credit for,
 approval of the appropriate depart-
 ze sufficient preparation. An exami-
 nation for waiver has been success-
 e course.

MAKEUP OF CREDIT FOR WAIVED COURSES

If a mathematics or natural science course required by the engineering cur-
 riculum is waived, the corresponding credit hours must be earned by satisfactory
 completion of a university-level course, either technical or non-technical, which
 is approved by the chairman of the department in which the student is enrolled.

WAIVER OF THE ENGLISH COURSE REQUIREMENT

A waiver of the English course requirement in the core curriculum will be grant-
 ed to those who achieve a score of 650 or higher on the English Composition
 Achievement Test of the College Entrance Examination Board.

CREDIT FROM INSTITUTIONS OF HIGHER LEARNING

Where there is no duplication involved either through course work or examina-
 tion, advanced standing may be granted for work successfully completed at
 accredited institutions of higher learning. It will be granted only when it meets
 the requirements for the degree sought at this University and may be accepted
 provisionally. Work of low pass grade (*D* or the equivalent) will not be con-
 sidered for transfer.

Although there is no strict limit to the total amount of transfer credit that
 may be assigned, a student must satisfy the residence and course requirements
 for the degree sought at George Washington University.

CREDIT FROM TECHNICAL INSTITUTES

Advanced standing may be granted for work successfully completed at techni-
 cal institutes. Credit will be granted for transferred work only when the appli-
 cant passes successfully the required validation examination. Arrangement for
 the examination should be made with the appropriate department of the School.
 In any event, no more than 30 semester hours of credit for technical work will
 be granted in transfer for those who graduated from a two-year technical insti-
 tute. A maximum of 60 semester hours of credit for technical work may be
 granted in transfer for those who graduated from a four-year technical institute.

CREDIT FROM SERVICE SCHOOLS

A limited amount of credit may be assigned for selected service school instruc-
 tion received since 1941. No more than 30 semester hours may be assigned for
 a combination of service schools and examinations referred to above. Veterans
 should submit to the Office of Admissions photostatic copies of their service
 school records, indicating courses successfully completed with sufficient identifi-
 cation of the course to locate it in the *Guide to Evaluation of Educational Ex-
 perience in the Armed Forces*.

CREDIT FROM BALTIMORE POLYTECHNIC INSTITUTE

Credit will be assigned to Baltimore Polytechnic Institute "A" course gradu-
 ates who have earned scores of 80 or above in the applicable courses equiva-
 lent to the following engineering core curriculum courses: Math 31, 32; Phys
 3, 15; Chem 13; Engs 4; EE 51.
